

mm

people are "bad at math"

↳ American curriculum focuses on speed rather than learning information

teachers want to lower information instead of making sure students ^{more} understand
students are left behind and believe they are dumb

ex. timed math tests ← do these help children? ①

treats students as a group rather than individuals

EHS is a small school yet I find more often than not teachers are not afraid of leaving students in the dust

adds more to stress and performance anxiety
students have to spend time outside of class to learn material rather than being taught by teachers

↳ teaching methods are prehistoric
most student can't grasp info when it is only presented to them

what does "college prep" mean and how is our school different from other schools

is our school really college prep? what is college prep? ②

students who don't fit the quick-minded mold of education (American) end up failing school even though they aren't dumb

schools force students to try to learn in only one mold

is school beneficial to one type of person? ③

why is American curriculum about speed? ④

↳ does this lead to academic anxiety? ⑤
